

## Quality Flags

From cruise 2013-01 on, data quality is expressed with the following flags:

- 1 = Sample for this measurement was collected but not analyzed. Sample lost.
- 2 = Acceptable measurement.
- 3 = Questionable measurement (probably good).
- 4 = Poor measurement (probably bad).
- 5 = Measurement not reported (bad).
- 6 = Mean of replicate measurements.
- 7 = Manual chromatographic peak measurement.
- 8 = Irregular digital chromatographic peak integration.
- 9 = Sample was planned for this measurement from this bottle but was not collected.
