

(2024-020)

La Perouse

CS: AKASH

13 Sep - 14 Sep
2024.

bottles = pink 101 297 mL.

→ 5508 CHL in transit 2024-020 loops:
there are some black bits (charcoal or rubber)
particles on the filter from intake. - seen
on Sach's 20um prefilter as well.

→ LB11. Chla series: 20um filters - red-brown
vs.
5m filters - yellow-light.

↳ ditto for LB12.

→ 166 CHL LCOS 2024-020 5m bot 15
↳ spit ~ 2 mL.

→ LCOG Chla sample series: abundance
of large brown diatoms - like large
crystals of brown sugar on filters, most
abundant on 5m. *Coscinodiscus*

#5136 = dropped on canter, butter side up.

#5151 B: spilled 5mL.

#5152 B: small black specs on filter. None on 'A'.
