Abstract

This cruise report contains a day-by-day sampling log and water column CTD data collected in Clayoquot Sound, British Columbia, Canada. Data was collected from August 13-25, 2006 aboard the R/V Clifford A. Barnes. The objectives of the cruise were to explore the factors that control organic matter remineralization in the water and preservation in the sediment, collect sediment and settling particles for organic analyses back in the lab at the School of Oceanography, University of Washington, Seattle, and to relate water column properties (e.g. oxygen content, temperature) and remotely derived information (satellite and aerial data) to carbon cycling in the fjords. An additional emphasis was placed on diel studies of plankton in the water of Tofino Inlet. Student researchers collected sediment and particulate samples within the oxygen minimum zone of Tranquil Inlet at the head of Tofino Inlet.

Introduction

The scientific objectives of the August 2006 cruise to Clayoquot Sound, Vancouver Island included various efforts related to organic carbon cycling in the inlets. Evaluations were made of water column conditions (temperature, density, oxygen content, chlorophyll fluorescence, etc.) within the inlets and sampling near surface light conditions for comparison with satellite/aerial data. To accomplish these goals, several types of measurements were made; CTD casts, multicore sediment grabs, water samples and incubations, plankton samples and near surface light characteristics. Data from the nutrient, chlorophyll, plankton, bacteria and satellite/aerial groundtruthing samples are being analyzed. CTD measurements were made at more than fourty stations throughout Clayoquot Sound (Figure 1). Water samples were collected at many stations and bacterial growth rates measured using ^3H -thymidine. At two stations, numbered 47 and 48, we deployed the sediment multicorer several times in order to collect sediment for evaluation of stable isotopic compositions of dissolved inorganic carbon. We also deployed a net trap to collect sinking particles at stations 47 and 48.

All inquiries for data should be addressed to Dr. Keil. Cruise participants and their affiliations are listed in Table 1.

The August cruise was divided into three legs:

- Leg 1 Aug 13-18, 2006: Water column survey of all of Clayoquot Sound. Cheryl Greengrove and Rick Keil took the lead. Measurements included water temperature, salinity, density, particle load, oxygen content, nutrients, phytoplankton abundance and identification, bacterial growth rates and water/atmospheric optical conditions. Our purpose was to identify key features that control the abundance of microscopic organisms in the Sound, and identify key physical features of the local ocean that determine water renewal and mixing in the Sound.
- Leg 2 Aug 19, 20 and 23: Focused effort in Tofino Inlet to evaluate sediment and water characteristics, and to evaluate coupling between the water and the watershed. Jon Nuwer and Rick Keil took the lead. We deployed sediment traps in Tofino Inlet near Rankin Rocks and in Tranquil Inlet. Sediment was collected using the multicorer atstations 47 and 48 in Tofino Inlet. We also deployed the weather station and optical spider (Logsdon) to record local water and weather conditions and upper water light field data.
- Leg 3 Aug 21-22: Diel studies of plankton in the water of Tofino Inlet. Rick Keil and Jennifer Cherrier were in the leadership roles. We investigated how sunlight impacts both phytoplankton and bacterial growth. Water at station was sampled regularly at ~2.5 hr intervals coinciding with sediment trap sampling.

Methods

CTD casts were made with a SEABIRD 911plus equipped with an oxygen sensor, fluorometer, transmissometer and PAR sensor and lowered at a rate of 20 m/min. Oxygen samples were collected and run on board using the Winkler titration method (Carpenter 1965). Nutrient samples were collected on 50 ml sample bottles and frozen for analysis by the UW Marine Chemistry Laboratory upon return. Bacterial growth was measured using the thymidine approach of Chin-Leo and Kirchman (1988) and the standard DAPI technique. Light measurements were made with a lightmeter attached to the CTD rosette and surface water characteristics determined by taking surface samples, filtering and storing for future analysis.

The settling trap is described in Peterson et al., 2005. Table 3 presents the CTD data. All times in Table 2 and 3 are local.

0955	CTD Sta 55	
1025	CTD Sta 46	
1050	CTD Sta 45	

Table 2 continued. Cruise event log, chronological order.

Time	Event	Notes
Friday Aug 18 continued		
1115	CTD Sta 56, also collected Van Veen grab – rocky with small encrusting corals	
1155	CTD Sta 57	
1215	CTD Sta 58	
1240	CTD Sta 59	
1302	CTD Sta 83 inner bank near town of Tofino	
1330	CTD Sta 84 on open shelf	
1440	Tied up in town at Weigh West Marina, afternoon free, swap personnel	
Saturday Aug 19		
0740	depart Weigh West marina, safety lecture for new persons aboard ship	
0920	Anchor out at Sta 47b near where weather station will go	
1012	Weather station deployed	
1235	Optical spider deployed near weather station	
1300	Anchor out at Sta 47 for sediment trap	
1430	Large sediment trap fully deployed in water	
1455	anchored in Tranquil Inlet (Sta 48) for trap deployment	
1545	small trap deployed	
1620	CTD Sta 48 anoxic deep water below 38 m	
1645	in situ pumping	
1815	Atleo Air flight to pick up Michael, Lucinda and Leon	
2000	evening free to process samples	
Sunday Aug 20		
0735	Avon aboard ship, ready to begin coring	
0755	Sta 48a multicore	
0910	Sta 48b multicore	
1010	Sta 48c multicore	
1110	moved to near large sed trap at Sta 47	
1215	Sta 47 multicore	
1320	Sta 47 multicore	
1400	Sta 47 multicore	
1520	Sta 47 multicore	
1550	Anchor up, headed to Tofino to swap crew again	
2018	Depart Weigh West with new science crew for diel studies	
2200	Anchor out at Sta 47b near spider	
2215	CTD Sta 47b to begin diel study	
Monday Aug 21		
0545	pump water from 4.5 m using pumping system – inadequate, switching to CTD for next time point	

Table 2 continued. Cruise event log, chronological order.
